Life at an MSP Today

Day-to-day tasks

- ✓ Create update report
- ✓ Image laptop
- ✓ User account set up
- ✓ Server maintenance
- ✓ Report on non-compliant devices
- ✓ Respond to privilege elevation request
- ✓ Respond to support escalations
- ✓ Update scripts
- ✓ Configure firewalls
- ✓ Create ACLs
- ✓ Monitor SIEM
- ✓ IPSEC VPN routing troubleshooting
- ✓ Log checking
- ✓ Group Policy creation
- ✓ Printer issue resolution
- ✓ Password resets web filter exclusions

Might-dos and wish list

- ❑ Create documentation
- ❑ Plan upgrades
- ❑ Learn new tech
- ❑ Read security notices
- ❑ Read KB articles
- ❑ Generate End-of-life/service reports
- ❑ Aggregate status reports
- ❑ Update web site
- ❑ Create marketing campaign
- ❑ Train sales department

It won't always be this way...

Life at an MSP Tomorrow

Day-to-day outcomes

- ✓ Client security assured
- ✓ Client compliance assured
- ✓ Client uptime assured
- ✓ Device health assured
- ✓ Incidents remediated
- ✓ Talent engaged in meaningful work

Value-added projects

- ✓ Develop relationships
- ✓ Train end users
- ✓ Create new agents
- ✓ Develop proprietary apps
- ✓ Deploy advanced solutions
- ✓ Advise and consult on business objectives

- ✓ GROW your business

There's room to have a life, too!

What is cloud-native?

Microsoft Entra ID

Microsoft Intune

Windows – macOS – iOS/iPadOS - Android - Linux

Why cloud native?

Zero trust is the union
of IT and security

Consolidated data for
analysis + insight + action

Building with Copilot
and AI 'agents'

Why should you care?

Talent is precious

IT is a 'commodity'

Margin is everything

The business premium journey
*managing modern workplace is
more than windows*

Navigating the modern work environment

Interconnected challenges surrounding modern work:

The productivity capacity gap

The pace of work is accelerating beyond human capacity, creating a need for new ways to enhance efficiency.

The AI security imperative

The adoption of AI and flexible work models expands the threat landscape, creating new data privacy and security challenges.

The cost of complexity

A fragmented landscape of single-point solutions can increase IT costs, operational complexity, and security risks.

Secure your productivity with Microsoft 365 Business Premium

Creating valuable work is the first step. Protecting it is the next. That's where Business Premium comes in.

Microsoft 365 Business Standard with Teams

A powerful suite of AI-enabled apps to help you create, collaborate, and run your business.

Teams

Exchange

OneDrive

SharePoint

Bookings

Outlook

Word

Excel

PowerPoint

Loop

Clipchamp

+ Microsoft 365 Business Premium with Teams

A comprehensive, enterprise-grade security layer to protect everything you've built.

Defends against sophisticated external cyberthreats

Safeguards sensitive internal data from accidental leaks

Manages access for all users and devices securely

A professional foundation for growing your business

PLANS WITH MICROSOFT TEAMS		CLOUD SERVICES including, but not limited to: 	APPS including, but not limited to: 	SECURITY	AVAILABLE ADD-ON  Microsoft 365 Copilot Business
Business Basic is an essential starting point, moving your collaboration and productivity to the cloud with web and mobile experiences.	\$6 user/mo. (300 seats max)	✓ ✓ ✓ ✓ ✓	Web and mobile only ✓ ✓ ✓ ✓ ✗ ✗	ESSENTIAL <ul style="list-style-type: none"> • Identity and access control • Email threat protection • Mobile device management 	✓
Business Standard provides the full power of the desktop applications your team is familiar with, adding richer creation tools.	\$12.50 user/mo. (300 seats max)	✓ ✓ ✓ ✓ ✓	Desktop, web and mobile ✓ ✓ ✓ ✓ ✓ ✓	ESSENTIAL <ul style="list-style-type: none"> • Identity and access control • Email threat protection • Mobile device management 	✓
Business Premium is our most complete offering, integrating advanced security and device management. Each of these plans serves as a foundation for Copilot, allowing you to add its AI capabilities when you're ready."	\$22 user/mo. (300 seats max)	✓ ✓ ✓ ✓ ✓	Desktop, web and mobile ✓ ✓ ✓ ✓ ✓ ✓	COMPREHENSIVE 	✓

Note: Not all features/products shown. Additional apps include: Planner, To-Do, and Forms. Price is subject to change based on subscription term, currency and region.

Verify user identities with strong authentication

With passwords being a primary attack vector, multi-factor authentication (MFA) is essential. MFA can prevent 99.9% of identity attacks. Get AI-powered analysis and filtering to help protect against business email compromise.

Passwordless

Use the Microsoft Authenticator app, Windows Hello, or FIDO2 security keys for convenient and highly secure sign-in experiences.

Broad Support

Choose from a broad range of MFA options, from push notifications to biometrics to hard tokens, to fit the needs of your business and users.

Safeguard one of your most valuable assets: Your data

With **Microsoft Purview Information Protection**, you can protect against the accidental sharing of sensitive information.

Use pre-configured policy templates to identify and protect data like credit card or social security numbers.

Control whether documents can be edited, printed, or forwarded by non-employees.

Classify and apply protection labels like "Do Not Forward" to sensitive emails and files.

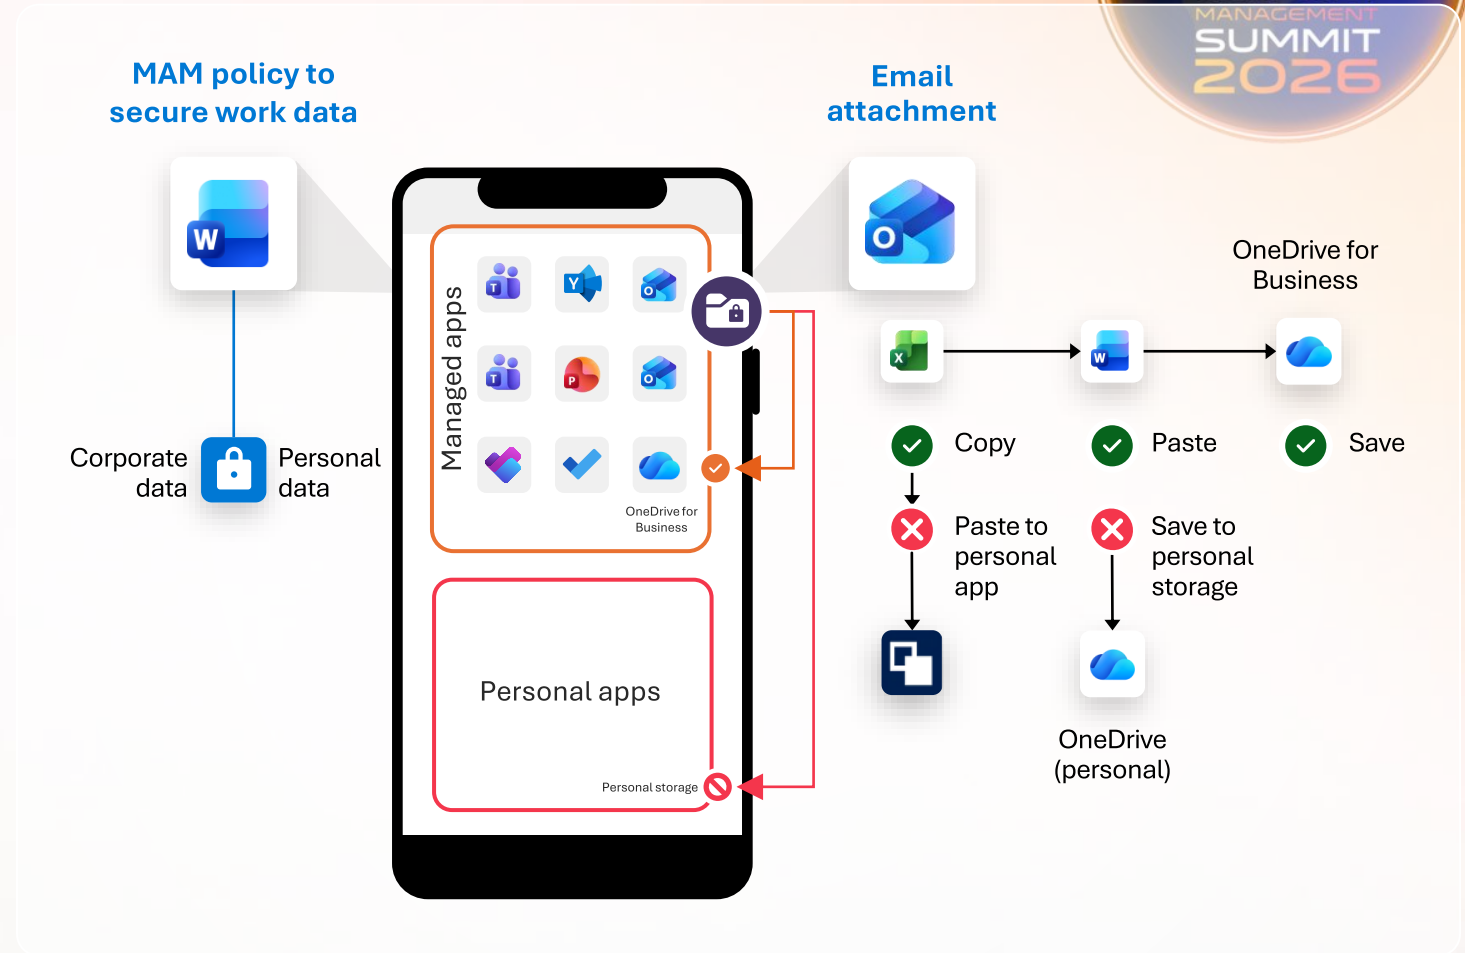

Securing corporate data in a "BYOD" world

With Mobile Application Management (MAM) in **Microsoft Intune**, you can apply security policies directly to corporate apps and data on personal devices, without managing the device itself. This allows you to:

- Help prevent corporate data from being copied from a managed app (like Outlook) to a personal app (like a personal notepad).
- Create corporate files that can only be saved to a managed location, like OneDrive for Business.

Securely manage access from anywhere

Microsoft Intune and Microsoft Entra ID P1* work together to ensure the right people have the right access, on any device.

- Manage security policies on company-owned and personal mobile devices.
- Enforce Conditional Access policies, such as requiring multi-factor authentication from untrusted locations.
- Remotely wipe corporate data from lost or stolen devices.

*Microsoft Entra ID P1 was formerly known as Azure AD Premium Plan 1.

Automate deployment

Streamline IT with automated device deployment

With **Windows Autopilot** and **Microsoft Intune**, you can reduce the time and effort needed to deploy new devices.

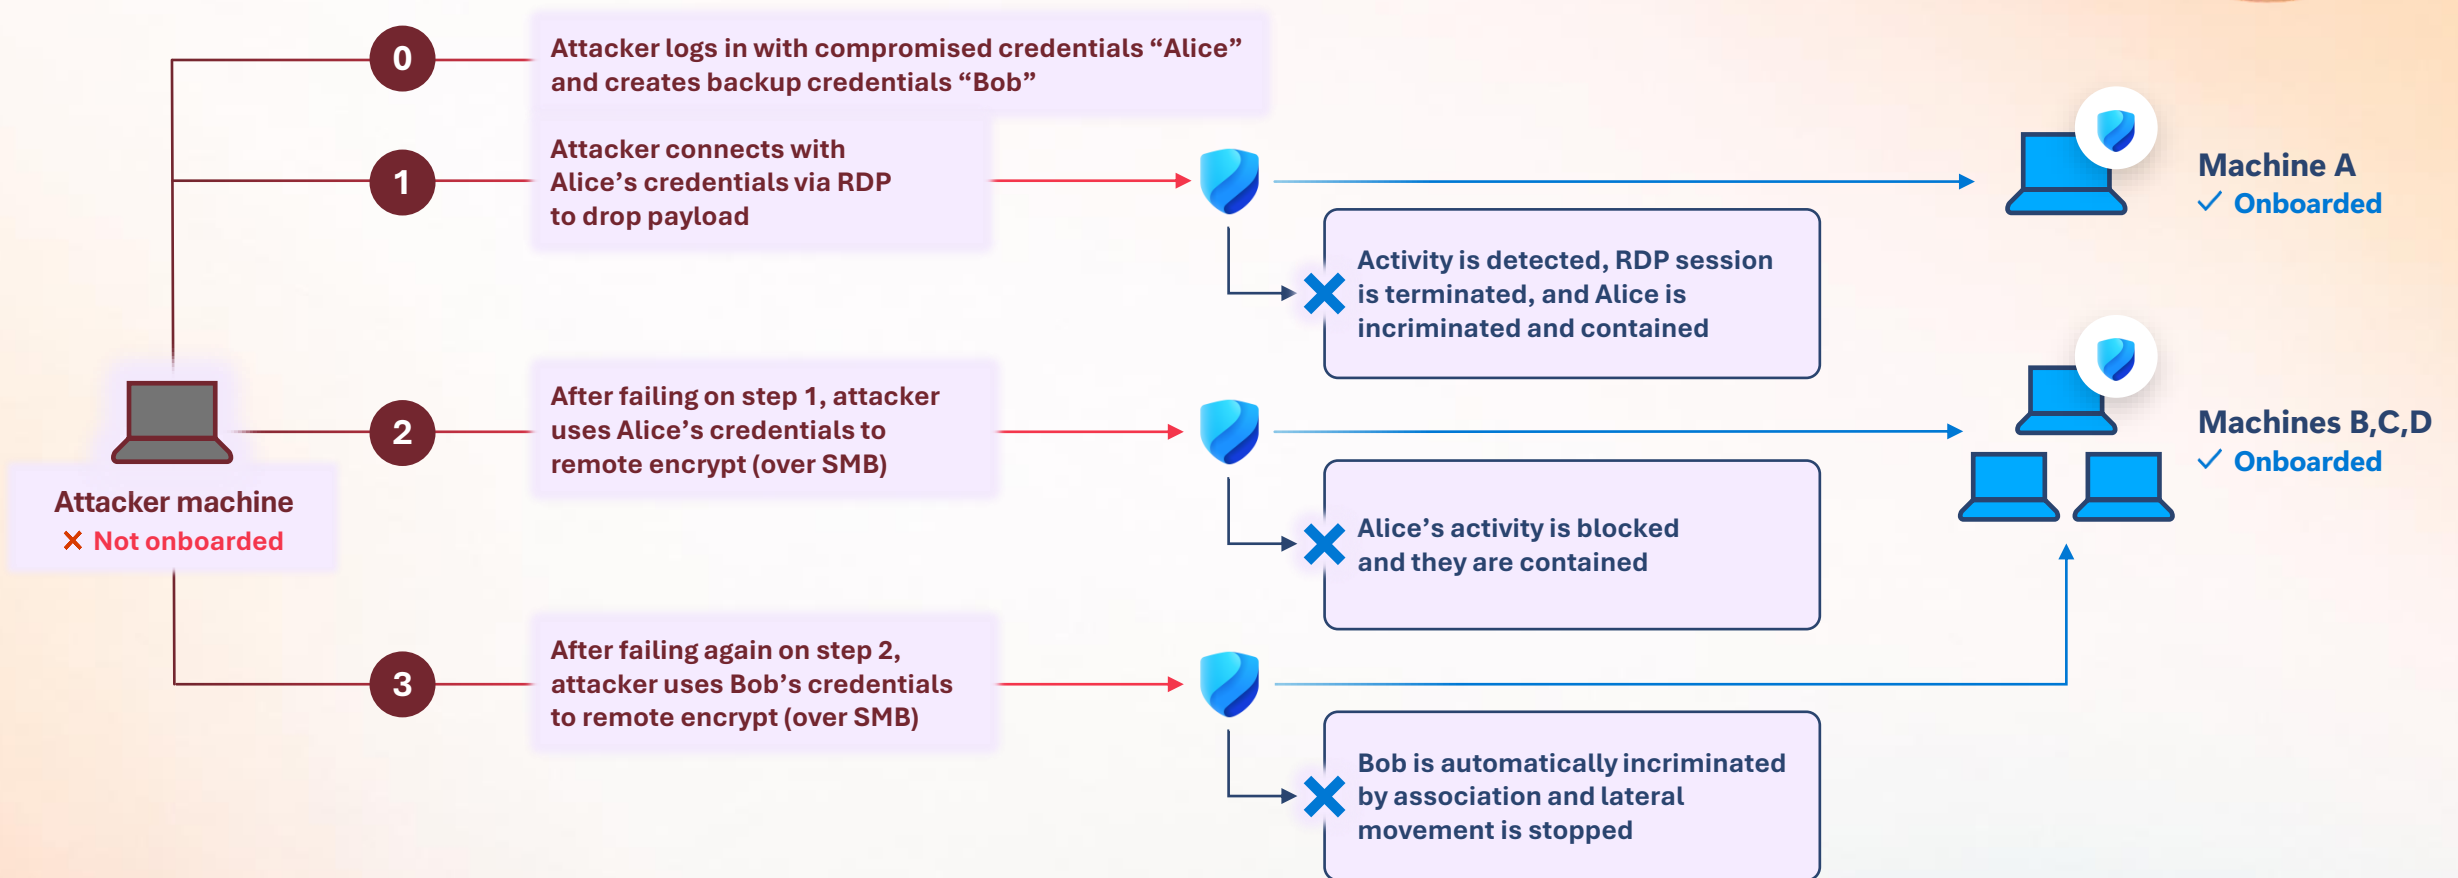

- Deploy and configure new Windows 11 devices with a "zero-touch" process for IT.
- Bypass traditional, time-consuming image-based deployment.
- Ensure devices are management-ready and secure right out of the box.

Go beyond detection with Automatic Attack Disruption

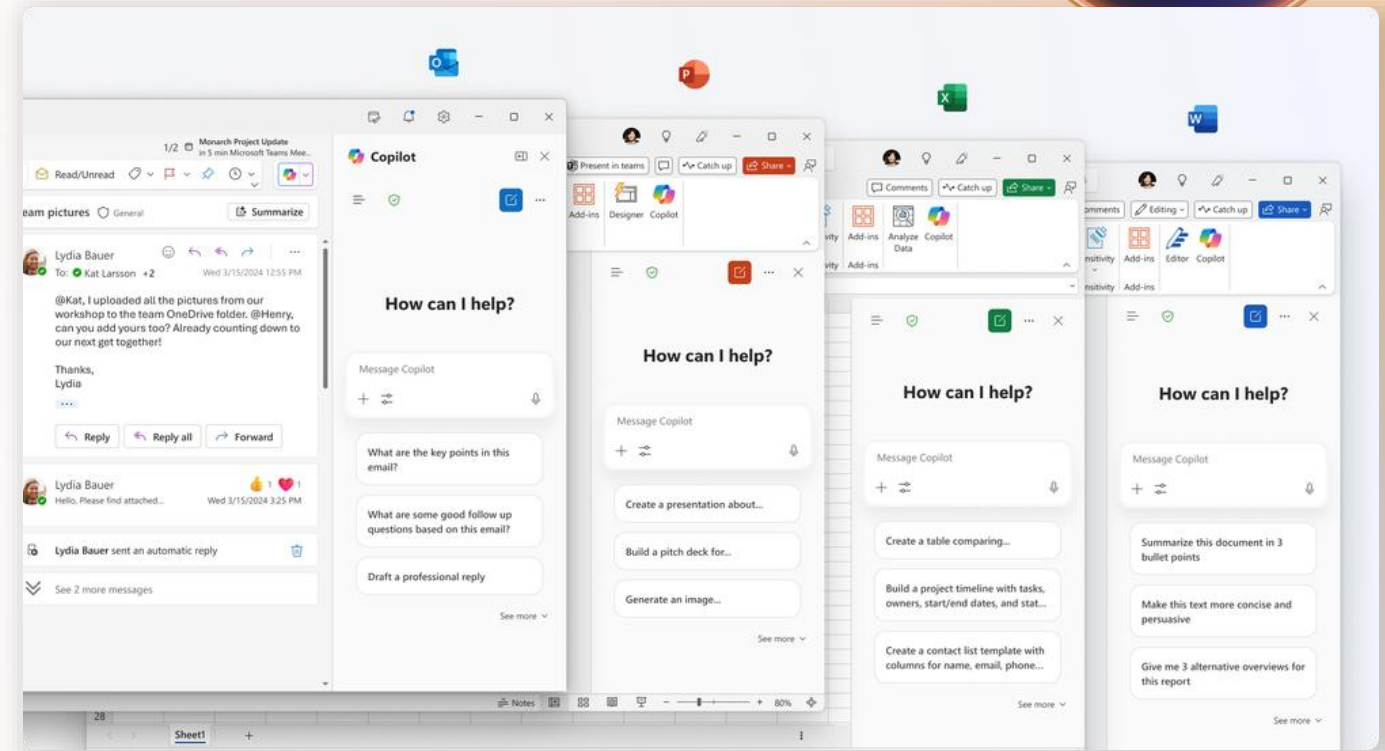

On by default, this AI-powered feature in Microsoft Defender for Business can disrupt in-progress ransomware attacks.

Adopt AI with confidence and control

Copilot Chat works alongside you in the apps you use every day. Business Premium provides the enterprise-grade data protection to ensure you can use AI with peace of mind, as Copilot inherits your existing security and data handling policies.¹

SENTINEL COSTS?

- **Free Data Sources in Microsoft Sentinel**

- Microsoft Sentinel offers several data sources that can be ingested at no additional Sentinel cost. However, there are important distinctions between what is free (alerts/incidents) and what may still incur costs (raw logs, retention, or Log Analytics charges). Below is a comprehensive overview of the free Sentinel sources, based on the latest information from Microsoft and community resources.

- **Core Free Data Sources**

- **Azure Activity Logs**

All activity logs from Azure are free to ingest into Sentinel.

- **Office 365 Audit Logs**

This includes logs from SharePoint, Exchange admin, and Teams activities. Only the audit logs are free; other data types may incur charges.

- **Security Alerts from Microsoft Defender Products**

Free ingestion applies to security alerts (not raw logs) from:

- Microsoft Defender for Cloud
- Microsoft Defender for Endpoint
- Microsoft Defender for Office 365
- Microsoft Defender for Identity
- Microsoft Defender for Cloud Apps
- Microsoft Defender for IoT
- Microsoft 365 Defender (incidents and alerts)

- **Azure AD Identity Protection Alerts**

Alerts from Azure AD Identity Protection are also free.

- **Additional Free Data Ingestion Allowances**

- **Microsoft 365 E5, A5, F5, G5 and Equivalent Security SKUs**

- Up to 5MB of free data ingestion per user per day for:
 - Entra ID (Azure AD) sign-in and audit logs
 - Microsoft Defender for Cloud Apps Shadow IT Discovery logs
 - Microsoft Information Protection logs
 - Microsoft 365 Advanced Hunting data

- **Microsoft Defender for Servers Plan 2**

- Provides 500MB of free data ingestion per day per node, covering specific security-related tables.

24x7 SOC Automation How does it look ?

Microsoft Defender portal implementation guide for MSSPs

Summarize this article for me

The Microsoft Defender portal is a unified security operations platform that brings together incident management, threat hunting, and workload management across multiple customer tenants. For a comprehensive overview of these capabilities and their benefits, see [Microsoft Defender multitenant management](#).

Multi Tenant Management

Transform Your MSP Operations with CIPP

The CyberDrain Improved Partner Portal (CIPP) is a comprehensive management platform designed specifically for Managed Service Providers working with Microsoft 365 and Azure environments. Born from 'Spite Driven Development' - we built what the industry actually needs.

Get CIPP

Github

OR

Join Our Discord

8,000+ CIPP users. Also available: [Documentation](#) & [GitHub](#)

The screenshot displays the CyberDrain CIPP dashboard. At the top, there's a 'Back to Templates' link and a section for 'My Default Baseline' which shows '100% Compliant', '0% Missing Required License', and '100% Combined Score'. Below this is a search bar and a table of tenant alignment. The table has columns for 'Tenant ID', 'Standard Name', 'Aligned Score', 'License Missing Percentage', and 'License Engagement Score'. A 'User Statistics' section features a pie chart and a list: Total 33, Licensed Users 25, Unlicensed Users 0, Guests 0, Global Admins 8.
